Websites for Schools

Design and build of your website

Using the skills and experience of staff from IBS Schools, we will work with you to design, build and then host and support your school website.

We have a selection of templates and we will work with identified staff from your school to develop the initial content for your web pages.

Training and support options	Services and charges – 2020	
We provide different support options depending on your school's requirements	Initial website build including half-day consultation	£1,200 (standard websites)
o Training for your staff to enable them to update and develop the content of your website	Website - Annual hosting and support *Includes one free Workshop session per term*	£250* per annum
o Advice and support from our Service Desk to enable your staff to manage your own website	Additional website development or refresh work	£120 Call out and first hour Additional charges £90 per hour or £400 per day
o IBS Schools staff can carry out changes and enhancements to your website, either through a bank of hours or through our published hourly charges for technical support. These charges apply to both remote and on-site sessions	Please note: For schools outside Worcestershire, travel time and overnight accommodation (if required) for work completed in your school to build your website will be added to the charges in line with costs incurred.	
o If you purchase our Peritech service you can identify website changes required and build these into the tasks for your Peritech to complete. However, please be aware this will impact on other tasks they normally carry out for you	Visits to schools to carry out website changes after your site has gone live are restricted to Worcestershire schools. Remote sessions will be used for other schools.	

Please contact our procurement team on 01905 765160 for further details and an order form.
